

### Price list for models and accessories

Our models come in a scale of 1:87 in gauge H0 with a 12 V electrical current.  
 For other models it is possible to fit another voltage. All of the unmotored oldtimer engines can be fitted with variable motors. At first you have to remove the axles from the engines. Afterwards lay the motor on a flat surface and carefully push the engine to one side. When you hear a "click" then it is ready to go. The Oldtimer streetcar models are also available in H0m.

**All prices are incl. Tax and excl. Ordering charge**  
**Last change to 04.02.2012**
